

GUESS WHAT KEEPS **EVERYDAY LIFE** RUNNING IN NEW MEXICO?

From grabbing coffee in the morning to eating out with family and friends, affordable and reliable energy plays a role in nearly every part of daily life.

Oil and natural gas help power the electricity that keeps restaurants open, grocery stores stocked, and food safe through refrigeration and temperature control. They also fuel the transportation systems that move products across the state and keep businesses connected to their customers. In New Mexico, oil and gas production generated roughly \$13 billion in state revenue in 2023, supporting roads, utilities, and public services that small businesses depend on to operate.

At the same time, energy-sector jobs help sustain local economies by driving consumer spending at restaurants, shops, & neighborhood businesses.
